Cheat conversion instruction
We grab Action Replay codes from http://www.codejunkies.com

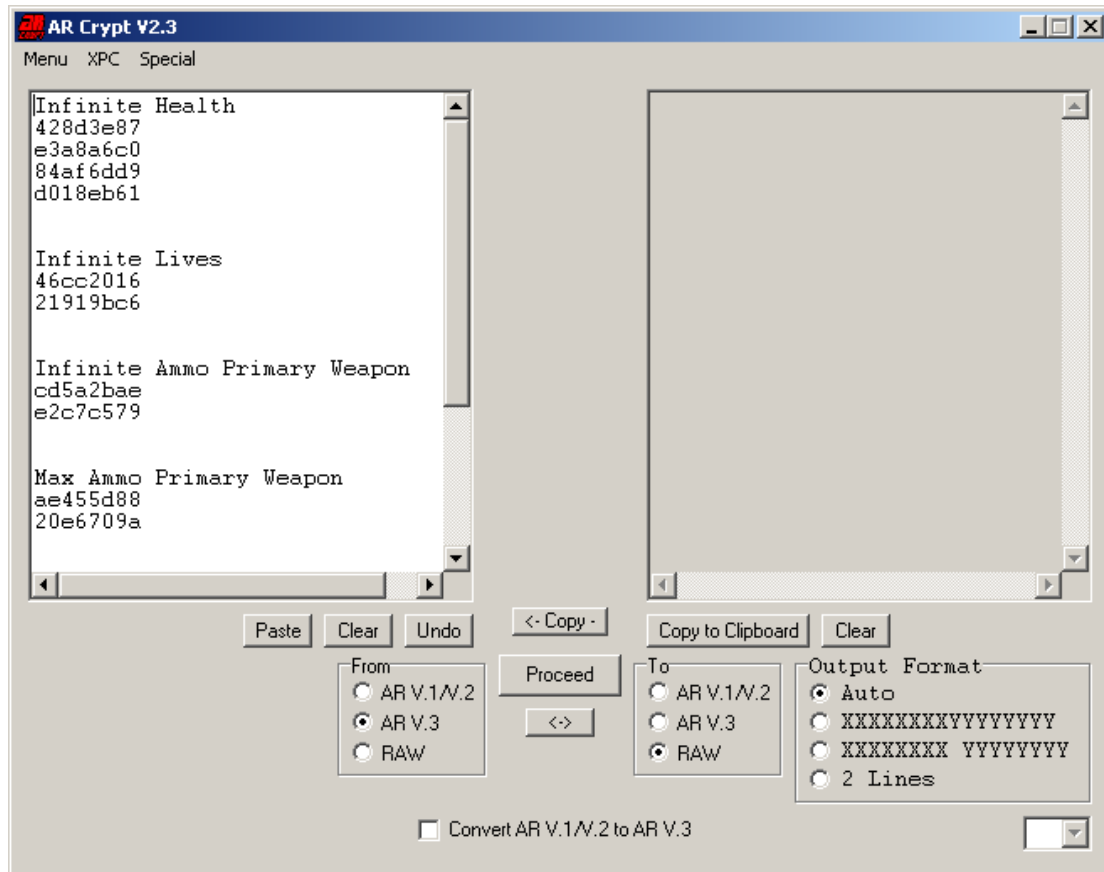

Find the game cheat which you need, **select them without (M) and AR button cheat(like AR button for slow motion).**
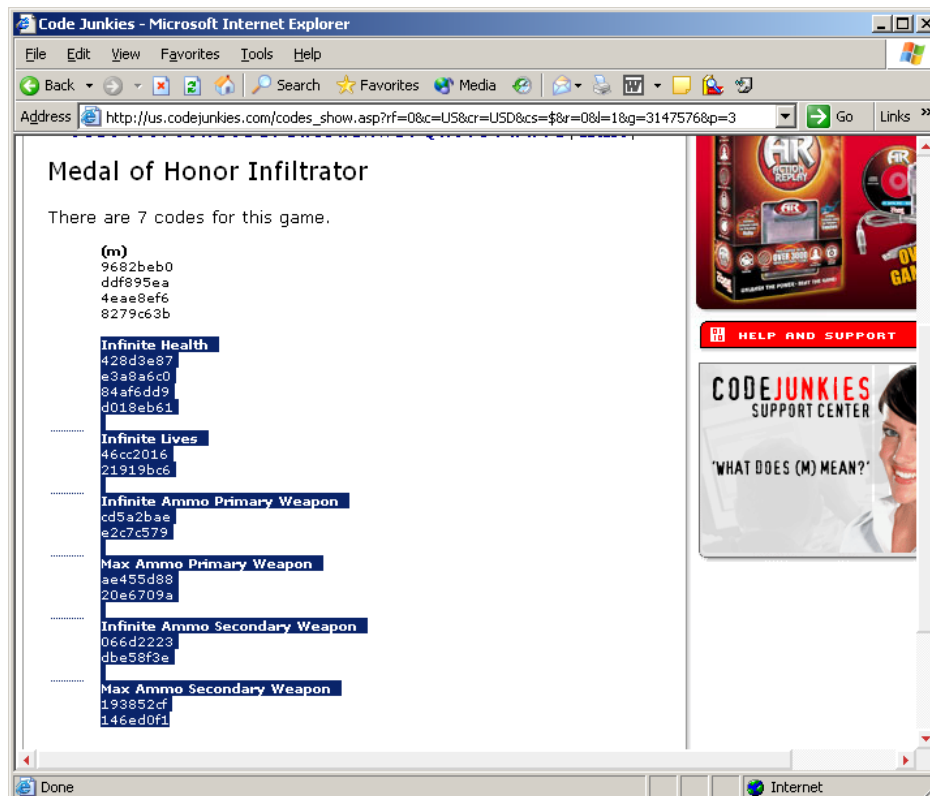

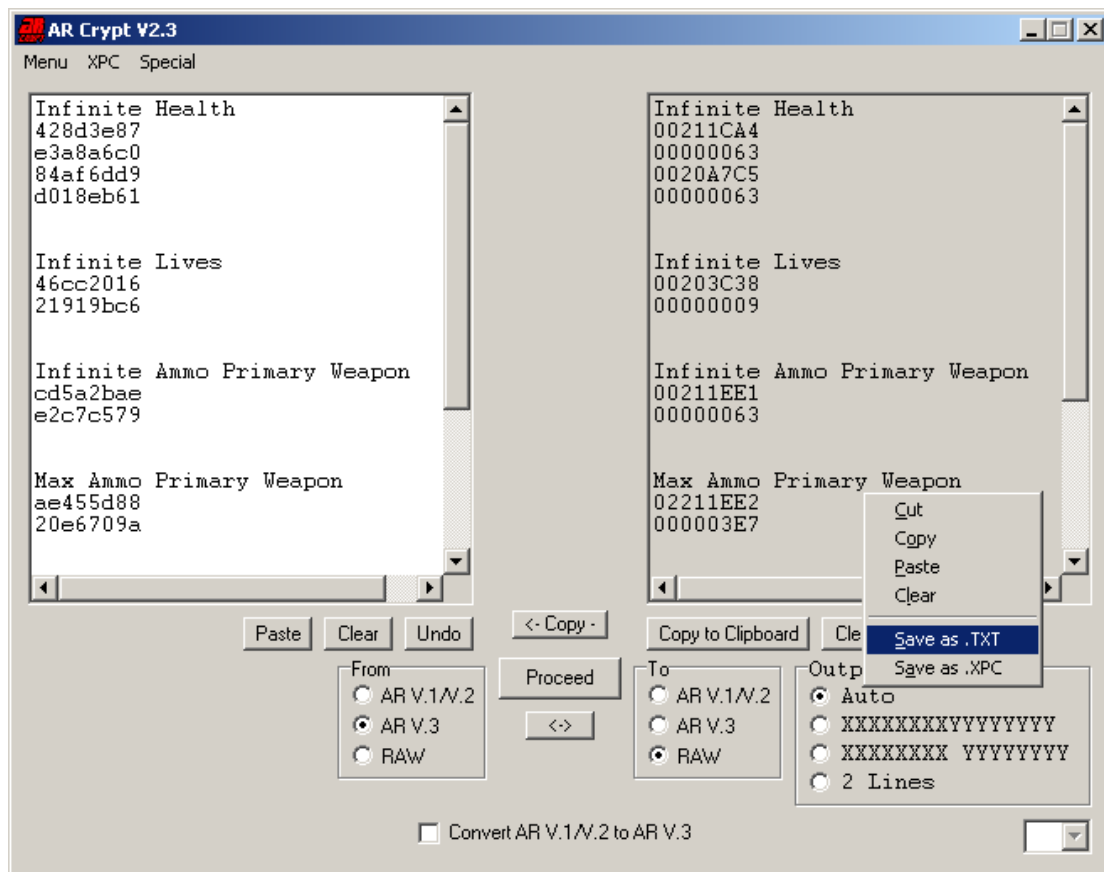

Paste the code into left window of AR Crypt.exe

Format the paragraph like below

Press **Proceed**

Right click the right window and save txt file

We suggest to use game name as the txt file name.

Open Convertor.exe, open the txt file

Press Convert , choose directory to save dat file and finish

In EFA Client 1.1 or later version, you can right click "cheat", select "edit cheat"
Then open dat file which you create before.
